5 simple tips to stay safe online

1 Pause before you click

If a message seems suspicious, don’t tap the link.
Open the official app or website yourself.

2 Use a passphrase

Use four or more unrelated words.
Choose a different passphrase for each account.

3 Turn on two-step verification

Add a second check when you sign in,
such as a code from an authenticator app.

4 Check the caller

If a call feels off, hang up and call back
using a number you’ve verified yourself.

5 Talk to your family

Show each other what scams look like.
Make it easy to ask for help if something feels off.
